TRAUMA NURSING CORE COURSE

An **ENNA** Course

INTRODUCTION

The Trauma Nursing Core Course (TNCC) is a 16-hour course developed by the Emergency Nurses Association to present a firm foundation in trauma nursing and to provide nurses with core or basic trauma cognitive knowledge and psychomotor skills that are associated with the delivery of professional nursing care to the trauma patient.

The ultimate goal of TNCC is to decrease the morbidity and mortality of the trauma patient by increasing the knowledge, skill, and level of nursing care provided in the Emergency Department.

Verification of successful course completion is based on passing the written exam and the Trauma Nursing Process (TNP) psychomotor skills station. Verification is valid for four years.

The Emergency Nurses Association is accredited as a provider of continuing education by the American Nurses Credentialing Center's Commission on Accreditation.

The Emergency Nurses Association is approved by the California Board of Registered Nursing, Provider #2322 for 17.54 contact hours.
