2019 Pediatric Emergencies

August 6 & 7, 2019
PIH Health Hospital Whittier
Registration: 7:30 - 8:00
Conference: 8:00- 4:30

Pediatric Emergencies 2019

Conference Overview:

This comprehensive, evidence-based curriculum is designed for the emergency practitioner to enhance their knowledge and understanding of pediatric emergencies. The focus will be on epidemiology, pathophysiology, assessment, and interventions for various emergent conditions presented by leading practitioners. Upon completion the participant will be able to:

- *Review techniques to assist technology dependent and autistic children in the emergency department.*
- *Describe trends in sexually transmitted diseases in adolescents*
- *Discuss pediatric considerations in disaster.*
- *Identify signs of pediatric sexual abuse.*
- *Discuss interventions for adolescent anxiety, depression and suicide.*
- *Review assessment and interventions for respiratory, gastrointestinal emergencies and DKA*
- *Learn the complications of poor prenatal care on the newborn infant*
- *Review burn assessment and current tools*
